

REMEMBERING ORIN!

The conch shell blows - the conch shell blows -
the conch shell bellows-

I am imploring all to touch and greet each other in the here
and the now.

Because we, as humans, will succumb to death and the spirit
continues to endure - rhythm is life and life is rhythm -

The conch shell blows - the conch shell bellows -

Innate spirituality - take a breath - breathe! Pulsate rhythmically!

World/words - galaxies - within! Without!

Rhythm! Rhythm! Rhythm!

Snap your fingers - tap your feet! Loosen up - feel the vibration -

close your eyes - flow with it! Be empowered. Light - life - love -

Cause/effect - effect/cause - "Maat"! Proper action/actions - balance!

Inside! Outside! Rhythm! Rhythm! Day - night - all in all - the "All"

Be Awakened!

I spent some foundational time with him - not passing but quality time.

In 1975 I shared my experience with him and he in turn expressed his
desire to be a medical Doctor - a Physician! He excelled in the sciences
which paved the way for him to be among two other students who
co-authored and published their research Titled Mossbauer studies of the
speciation of Tributyltin compounds in seawater and sediment samples
January 1986 Volume 27. His academic prowess in the sciences generated
reviews and recruitments to major institutions to pursue Chemistry, but he
was relentless on being accepted into medical school.

I will continue to describe Orin as an Architect of the world/worlds. He
was grounded, rooted and rounded. He participated in sports and
understood the nature of competition - teaching as the game progresses.
His peers understood his commitment to mastery whether basketball,
chess, badminton, draughts, - or academics.

As a scientist he understood clearly the concepts of past, present and future
are "one" and the same. Yes! He was a scientist - and chemist - alchemist.
His core was the seven Hermetic Axioms and I am isolating the Principle
of Mentalism - the all is mind; The Universe is Mental and the Principle of
Correspondence "As above, so below, as below, so above" and more so
"the all is everything and everything is the all". He delved into the true
nature of energy, power, and matter, which are "subordinate to the mastery
of the mind". His underlying thought was that "modern technology is partly
based upon our manipulation of the spectrum". Vibrations Oh! Vibrations!

Hug the realms of light - he did! He created substantial frames of references.

My message to his nieces, nephews and to youths is that they should continue to pursue their own “investigations into the realm of the real”...

Naked Truth! He did! Continue his work - Hidden Treasures!

“Without courage there can be no Truth”. I have a different view of his struggles.

Be Awakened!

Peace unto him! Asante Sana (Thank you very much)
